

CHINA INSTANT OFFICE

Business in China

China has rapidly become a rising global economic power rising to the worlds second largest economy. Foreign Domestic Investments (FDI) continues to grow in high-tech, agricultural, forestry, medical, consumer product and energy industries.

THE BENEFITS

China Business Challenges

China can be an overwhelming location to consider establishing a business. While it's the world's largest population, it's also complex to navigate it's regulatory and unique business culture.

From the window of the world China's corporate aesthetic could appear like a horizon of state owned enterprises and multi-national firms. In fact, recent growth in the service sector of GDP in China point to the significance of the small-midsize entrepreneurial business driving the new China economy.

CUBD has operated in China since 2004 and can now offer companies affordable access to China.
